

FREE TRAINING GUIDE

THE PLAN THAT GOT ME TO THE BRITISH FINALS

The exact 5-day split. Every session. Every set. Every rep.

2026 BRITISH FINALS EDITION
LEON CHARLES

LEON CHARLES COACHING

RIGHT BROTHER - READ THIS BEFORE YOU START

This isn't some copy-paste template I've knocked up to grow my email list.

This is the exact 5-day plan I'm running RIGHT NOW to prep for the 2026 British Finals. My last competition ever.

Every session. Every exercise. Every working set. Every rep target.

Laid out exactly as I use it. No made-up bonus work. No filler to make the PDF look thicker.

BUT HERE'S THE THING BROTHER.

This is a bodybuilder's plan. 5 days a week. 7-9 exercises per session. Built around a life where training is close to the top priority.

That's my life. It might not be yours. If you're a busy dad running on 2 or 3 sessions a week, this exact split isn't going to fit into your schedule. And that's fine.

Because here's what this plan actually gives you:

- ▶ A look at how I train at the level required to earn a British Finals invitation
- ▶ Exercise selection that actually works - no fancy shit for the sake of it
- ▶ The execution standards that separate people who get results from people who just show up
- ▶ Proof that structure beats motivation every single fucking time

COPY THE STANDARDS. NOT NECESSARILY THE SPLIT.

Read the execution rules on the next page. Nail those. Then either run this plan as written if you've got 5 days a week to give it OR use the standards on a training plan built for YOUR actual life.

I'll show you how to build that on page 9.

LEON

TRAIN HARD. EAT SMART. LOOK GOOD.

HOW TO RUN THIS PROPERLY

The plan is the easy bit brother. Execution is where you separate yourself.

01

WARM UP. DON'T FUCKING GAS YOURSELF.

Raise your temperature. 5-10 minutes. Then progressive feeder sets before the first big lift. Warm-up sets are NOT counted in the table. Don't smash 4 pyramid sets then wonder why your working set felt shit.

02

TOP SET + BACK-OFF SET

Where you see 1 + 1 that's ONE heavy set in the 8-12 range, then ONE back-off set with less weight for 12-15 reps. Not "one warm-up then one working." Two working sets. Both taken to the fucking edge.

03

TRAIN TO TECHNICAL FAILURE

Your working set ends when the next clean rep isn't fucking possible. On free-weight compounds stop before your position breaks down. On machines go until you physically can't move the weight another inch. If you're stopping when it "starts to feel hard" you're not training. You're rehearsing.

04

PROGRESS THE FUCKING LOGBOOK

Beat your last session. Add a clean rep. Add a small amount of load. Once you own the top of the rep range increase the weight and rebuild from the bottom of the range. If you're doing the same weights for the same reps week after week, you're not training brother. You're just showing up.

05

REST LONG ENOUGH TO ACTUALLY PERFORM

2-3 minutes on hard compounds. 90-120 seconds on isolation. Do not turn your session into cardio. Your goal is to hit the working set with everything you've got, not survive 45 minutes of half-effort.

06

KEEP THE PLAN FUCKING CLEAN

Do the listed work. Track it. Recover. Repeat. Don't add extra sets because you're bored. Don't swap exercises because you saw someone on TikTok doing a fancy finisher. Don't tell yourself "just one more" every session. The plan works when you actually work the plan brother.

YOUR TARGET: BEAT THE LOGBOOK EVERY SESSION WITHOUT CHANGING THE FUCKING EXECUTION.

General fitness info only brother.

If something hurts sharp, stop.

If you've got existing injuries, get proper medical clearance first.

MONDAY

01

CHEST / SIDE DELTS / TRICEPS / ABS

#	EXERCISE	SETS	REP TARGET
01	Incline Chest Press Machine	1+1	8-12 / 12-15
02	Chest Press Machine	1+1	8-12 / 12-15
03	Pec Deck Machine	1+1	8-12 / 12-15
04	Dumbbell Lateral Raise	1+1	8-12 / 12-15
05	Tricep Pushdown	3	12-15
06	Overhead Tricep Extension	3	12-15
07	Seated Ab Crunch	3	15-20

SESSION STANDARD

Press with control. Own the stretched position - don't just bang reps out. Keep lateral raises strict, no swinging. Triceps at the end aren't optional finishers brother - that's where the shape comes from. Do the work.

1 + 1 = ONE 8-12 TOP SET, THEN ONE 12-15 BACK-OFF SET.

TUESDAY

02

BACK / REAR DELTS / BICEPS

#	EXERCISE	SETS	REP TARGET
01	Lat Pulldown Machine	1-1	8-12 / 12-15
02	Seated Cable Row	1-1	8-12 / 12-15
03	Barbell Bent-Over Row	1-1	8-12 / 12-15
04	Reverse Flyes Machine	1-1	8-12 / 12-15
05	Preacher Curl Machine	3	12-15
06	Seated Incline Dumbbell Curls	3	12-15

SESSION STANDARD

Drive with your elbows, not your hands. Keep the target muscle loaded through the whole rep. Don't turn every row into a lower-back exercise brother. Finish rear delts and biceps like you mean it.

1 + 1 = ONE 8-12 TOP SET, THEN ONE 12-15 BACK-OFF SET.

03

WEDNESDAY

QUADS / HAMSTRINGS / ADDUCTORS / CALVES / ABS

#	EXERCISE	SETS	REP TARGET
01	Smith Machine Squat	1+1	8-12 / 12-15
02	Leg Press Machine	1+1	8-12 / 12-15
03	Leg Extension Machine	1+1	8-12 / 12-15
04	Leg Curl Machine	1+1	8-12 / 12-15
05	Adductor Machine	1+1	8-12 / 12-15
06	Barbell Romanian Deadlift	1+1	8-12 / 12-15
07	Standing Calf Raise	3	12-15
08	Cable Kneeling Ab Crunch	3	15-20

SESSION STANDARD

Earn every rep through full range. No bouncing the squat. No cutting the leg press short because it burns. No turning the RDL into a lower-back movement. This is where you find out how serious you actually are brother.

1 + 1 = ONE 8-12 TOP SET, THEN ONE 12-15 BACK-OFF SET.

FRIDAY

04

QUADS / CHEST / SIDE DELTS / TRICEPS

#	EXERCISE	SETS	REP TARGET
01	Leg Extension Machine	1+1	8-12 / 12-15
02	Adductor Machine	1+1	8-12 / 12-15
03	Leg Press Machine	1+1	8-12 / 12-15
04	Dumbbell Lateral Raise	1+1	8-12 / 12-15
05	Incline Chest Press Machine	1+1	8-12 / 12-15
06	Pec Deck Machine	1+1	8-12 / 12-15
07	Overhead Tricep Extension	3	12-15
08	Tricep Pushdown	3	12-15

SESSION STANDARD

This is NOT a throwaway second push session. Train the quads first with the same intent as Day 3. Then attack chest, delts and triceps like it's Monday morning. Half-effort here = wasted day.

1 + 1 = ONE 8-12 TOP SET, THEN ONE 12-15 BACK-OFF SET.

SATURDAY

05

HAMSTRINGS / GLUTES / BACK / REAR DELTS / BICEPS

#	EXERCISE	SETS	REP TARGET
01	Lying Leg Curl Machine	1+1	8-12 / 12-15
02	Abductor Machine	1+1	8-12 / 12-15
03	Hyperextensions	1+1	8-12 / 12-15
04	Lat Pulldown Machine	1+1	8-12 / 12-15
05	Single-Arm Dumbbell Row	1+1	8-12 / 12-15
06	Seated Cable Row	1+1	8-12 / 12-15
07	Reverse Flyes Machine	1+1	8-12 / 12-15
08	Preacher Curl Machine	3	12-15
09	Seated Incline Dumbbell Curls	3	12-15

SESSION STANDARD

Hamstrings first - no compromise. Then build the back from multiple angles and finish rear delts and biceps proper. Keep the execution identical as fatigue builds. This is the session that separates people brother.

1 + 1 = ONE 8-12 TOP SET, THEN ONE 12-15 BACK-OFF SET.

BUSY DAD? HERE'S THE HONEST BIT.

Let me guess.

You've read through the 5 days and you're already doing the maths in your head.

"Mon, Tue, Wed, Fri, Sat? (Thu & Sun are my rest days) When the fuck am I supposed to do that with work, kids and everything else?"

Here's the honest answer. You're probably NOT going to run this exact plan and that's fine.

BUT HERE'S WHAT YOU CAN STEAL.

- ▶ **The exercise selection - everything on this plan is battle-tested. No fancy shit for the sake of it. Use these movements on YOUR plan.**
- ▶ **The rep ranges - 8-12 for strength, 12-15 for back-off / hypertrophy. Works whether you train 2 or 5 days a week.**
- ▶ **The execution standards - the 6 rules on page 3 apply to ANY plan. Nail those and you're 90% of the way there.**
- ▶ **The progression method - beat the logbook. Simple. Ruthless. Effective.**

WHAT YOUR PLAN ACTUALLY NEEDS TO LOOK LIKE.

If you've got 2-3 days a week you need a full-body approach, not this bodybuilder split.

If you've got 3-4 days an upper/lower rotation might fit better than 5 body-part days.

If you've got 4-5 days you can adapt this split down.

The plan depends on YOUR life. Not mine.

That's exactly what I do when I take on a 1-2-1 coaching client. We build the plan around YOUR reality, your schedule, your recovery, your history, your goals.

Not a copy-paste. Not a PDF. A plan built for the dad you actually are.

FLIP TO THE NEXT PAGE FOR HOW WE MAKE THAT HAPPEN ▶

THE PLAN IS EASY. EXECUTION IS FUCKING HARD.

A PDF can't adjust for your schedule when work goes mental.

It can't rebuild the plan when the kids are ill for a week.

It can't tell you when you're smashing it and when you're taking the piss.

I can.

1-TO-1 ONLINE COACHING WITH ME

This is where the actual magic happens brother. Not in the PDF you just read.

- ▶ **Training plan built for YOUR week. NOT mine. NOT some bodybuilder's. YOURS. 2, 3, 4 or 5 days depending on what your life actually allows.**
- ▶ **Nutrition structure that fits YOUR life – family dinners, weekends, work chaos, meal deals, all of it. Built around how you actually live.**
- ▶ **Weekly check-ins on YOUR data – every week I look at what's actually happening. Your food. Your training. Your recovery. And if something needs changing – I fucking change it.**
- ▶ **Direct WhatsApp access to me – not some assistant. Not a chatbot. Me.**
- ▶ **Honest feedback – I'll celebrate your wins. I'll also tell you when you're fucking yourself over. Because you're not paying me to protect your feelings brother. You're paying me for a result.**

THIS IS FOR YOU IF:

- ▶ You're a busy dad who's genuinely done starting again
- ▶ You'll do the work when you say you will
- ▶ You want a coach who actually gives a fuck about the outcome
- ▶ You're ready to stop guessing and follow a plan built for your life

THIS ISN'T FOR YOU IF:

- ▶ You want your hand held every step
- ▶ You'll argue with the plan instead of following it
- ▶ You'll disappear for 2 weeks then come back with excuses
- ▶ You're looking for the cheapest option, not the best fit
